The Chemistry Set is a multi-monitor installation, using imagery of the four elements to a soundtrack of dense, layered, dance music. It is dedicated to the proposition of the record and the video producer as modern day alchemist; the one for whom "There's not a problem that I can't fix: 'cos I can do it, in the mix....."

Mix by Tom Morley. Camera and post-production facilities, IVA.

Financially assisted by the Arts Council and N.E. London Polytechnic.
