

INTERNATIONAL VIDEO ART
OTHER VISIONS
NATIONAL FILM THEATRE: THURSDAY 26th MARCH 1987

This is the second evening in our short season of Video Art at the NFT. It divides conveniently into two general themes: montage, or electronic collage, and work based on performance, which can be seen to incorporate narrative threads. The tapes included here come mainly from Britain, with a few from North America and one from Europe. The selection process has ruthlessly avoided any rules except that the tapes should be relatively short and positively excellent. *Mick Hartney*
