Film Maker

167 Kings Road Arches  
Brighton Seafront

Currently working with film, video and sound, through ideas and events of an extended nature, often with a 'temporal and spatial' concern/construct.

'In a sense I use the medium best suited to the idea/concerns that I have at a particular time, not just working with a medium for its own sake or for the sake of tradition. Indeed, certain aspects of my work attempts to evolve beyond a preconceived form/frameline, towards something more truly challenging/experiential of its time and place, whether it be seen, heard or sensed.'
